Our company is proud of our long-standing commitment to healthcare. Founded more than 100 years ago, our dedication to healthcare dates back to 1928 when Standard Register founder John Q. Sherman led a community drive to raise \$1 million in 30 days to build Dayton's Good Samaritan Hospital.

Since then, we have been devoted to improving patient care. Every day, our team of more than 175 dedicated healthcare professionals work side-by-side with clinicians and staff to enhance patient engagement and the quality of care. In short, we are dedicated to making healthcare better.

Acquired by Taylor Corporation in 2015, Taylor Healthcare, a part of Taylor Communications, Inc., is a marketing and communications company serving the healthcare industry with a broad spectrum of tangible and digital solutions—primarily in the acute, long-term care and payer markets.

We help our customers standardize and manage communications across the continuum of care, enabling them to engage patients and families with the right information at the right time to influence behavior and improve outcomes.

85425G	4-Up Green	2500	8 1/2 x 11	Full Chemical Sensitive VOID Coating, Laser Lock, Enhanced Laid Lines, and Fluorescing Watermark

A recognized authority in document security, Taylor Healthcare worked with issuers and states for years to provide more secure prescriptions. By employing new technology and strictly controlled processes, Taylor Healthcare has developed secure prescription programs that have significantly reduced fraudulent prescription activity.

Case in point: Taylor Healthcare worked with the state of New York to reduce prescription fraud. The state reported the elimination of more than \$68 million in fraud within six months of deploying a secure prescription program that mandated use of Taylor Healthcare’s prescriptions.

When Congress passed the bill requiring “tamper-resistant” prescription pads for written Medicaid outpatient prescriptions, the Centers for Medicare and Medicaid Services (CMS) and state Medicaid directors sought the counsel of Taylor Communications to understand the nature of fraud and to learn how to create truly tamper-resistant prescriptions.

* Paper also includes Enhanced Laid Lines and Fluorescing Watermark

Secure Prescription: Direct Thermal Printer

The Secure TSP800IIRX Prescription Printer is the only thermal printer available for the medical industry with a locking mechanism to deter unauthorized removal of prescription media. The wide print width (for state standard prescription paper), high print speed and silent printing make the TSP800IIRX the perfect Prescription Printer for any medical office, hospital or clinic.

Benefits / Features

- Locking Paper Chamber deters unauthorized form removal
- Disable Paper Feed function deters unauthorized dispensing
- Kensington Lock Slot provides additional security against theft when a locking cable harness is used (customer to supply cable)
- High Print Speed – 37 prescriptions per minute at 203 Dots Per Inch (180mm/sec.)
- Wide paper format 4.375" (104mm) with a print width of up to 4" allows printing of prescriptions, labels, forms and reports
- Easy "Drop-In & Print" paper loading
- Direct thermal printing eliminates the need for ribbons or ink cartridges
- Barcode capabilities include Code 39/93/128, ITF, Codabar, PDF 417
- Sensors for "Near End," "Top of Form," "Cover Open," and "Paper Out"
- Jam-proof automatic cutter with full or partial cut: rated for up to 2 million cuts
- Includes external power supply
- Charcoal gray case with a small footprint (7" x 8")
- Drivers available include: Windows XP 32 bit, Vista 32/64 bit, Windows 7 32/64 bit, Server 2008 32/64 bit, XP embedded, Linux, OPOS, JavaPOS, MAC OS X
- Certifications include: UL and C-UL, FCC, CE marking
- Works perfectly with Taylor Healthcare's Secure Thermal Prescription Paper for maximum security

Secure Prescription: Direct Thermal Printer

These printers are customer installable. They do not include cables; order the appropriate cable.

Standard Warranty

One year on labor, one year on print head and cutter and three years on all other parts. Printers must be returned to STAR Micronics to obtain service (depot).

Warranty Upgrades

Upgraded warranties extend labor, printhead and cutter warranties to three years. All warranty upgrades must be ordered at the same time as the printer.

Laser Checks: Bottom Panel

US companies lose more than \$900 billion to fraud, with counterfeiting and document fraud responsible for two thirds of that amount, according to the Association of Certified Fraud Examiners. Checks are the payment type most vulnerable to fraud attacks and 77 percent of organizations affected by payments fraud report that checks were targeted, the Association for Financial Professionals said in their 2015 AFP Payments Fraud and Control Survey. Check fraud accounts for the largest dollar amount of financial loss because of fraud.

Checks accounted for 50 percent of B2B payments in the US because organizations' business partners are hesitant to switch to electronic payments and

those partners also balk at sharing bank information. To help mitigate check fraud, financial professionals cite controlled check stock not readily available to fraudsters and the use of dual-time true watermarks as the most effective features in preventing fraud, according to the 2015 AFP report.

Taylor Healthcare is an industry leader in fraud protection. Our thorough understanding of business documents and practices, a myriad of security-related patents, broad technology and engineering capability and an integrated suite of print and digital security mechanisms help healthcare organizations prevent fraud in many forms: counterfeiting, tampering, identity theft and embezzlement.

There are so many ways we can help!

Avoid Readmissions and Drive Patient Engagement with our Discharge Folders

Taylor Healthcare's discharge folders help hospitals organize patient information about diagnosis, continued care and hospital resources. As a patient is being discharged from your facility, present them with these simple, branded folders that include education materials to manage their care, pertinent information on their next appointment, important numbers to call in case of an emergency, and medication schedules.
